

# Taras Vasylykiv

## Frontend Developer

### SUMMARY

Hi, I am a Front End developer. I focus on HTML5, CSS3, JS, and React. I enjoy constantly improving in these technologies and performing various tasks.

Attentiveness, patience, and quick learning are my strengths. I consider myself a responsible developer who can analyze problems and find practical solutions, moreover, I can work in a team and cooperate with colleagues to achieve common goals.

If you're looking for an energetic front-end developer ready to contribute to your team, please don't hesitate to contact me. I look forward to discussing how I can be a valuable asset to your company.

### PROJECT EXPERIENCE

#### TEAM PROJECTS

- [Power-pulse GitHub](#) [Redux Toolkit / RTK Query, Node.js / Express]

**Project type:** Multipage website for tracking daily calorie intake and managing user fitness journeys. **Project goal:** To develop a platform that enables users to monitor their daily calorie consumption and effectively manage their fitness routines and journeys. **Role:** Lead developer responsible for implementation.

**Achievements:** Accomplishments include improving development skills by mastering Redux Toolkit/RTK Query and Vite to ensure seamless functionality and improve user experience

- [Cinemanica GitHub](#) [HTML, SCSS, JS, Parcel, REST API]

**Project type:** A multi-page website for searching for movies, watching trailers, and storing them in your library.

**Project goal:** To create a platform that provides users with a convenient way to find movies, watch their trailers and store them in their library

**Role:** Team lead, developer. **Achievements:** Organization of work on the project, the logic of problem-solving, and front-end development skills.

- [MIMINO GitHub](#) [HTML, CSS, JS, VITE]

**Project type:** A multi-page website that provides information about the hotel and its services.

**Project goal:** To create a web presence for the hotel to present its services and attract new customers.

**Role:** Team Lead, developer. **Achievements:** Team management, leadership skills, implementation of coding skills.

#### OTHER TEAM PROJECTS

(in process) [Clty-for-Citizens GitHub](#) [NEXT.JS, TailwindCSS, google-maps/api, i18next]

#### PET-PROJECTS

- [Contact book GitHub](#) [React, Redux, Node.js/Express, MongoDB, REST]

A web application designed to streamline contact management. Users can create, edit, and organize their contacts online. The app offers features for adding, editing, and searching contacts. Implemented with React for the frontend and Node.js, Express, and MongoDB for backend functionality, ensuring a seamless user experience in managing contacts efficiently.

- [CarGoUA GitHub](#) [React, emotion/styled, Redux, mockapi, VITE]

React application for a car rental company. Users can browse the catalog of available cars and view their favorite cars. The app also allows users to filter cars by brand, hourly rental price, and mileage.

- [Web-Studio GitHub](#) [HTML, CSS, JavaScript]

Project goal: Acquiring basic layout skills.

Main achievements: Mastered the basics of HTML and CSS and gained experience in project management. I applied the principles of responsive design to ensure that content is displayed correctly on different devices.

#### OTHER PER-PROJECTS

[CineSearch GitHub](#) [React.JS, Styled-components, WebPack, REST API]

[PicFinder GitHub](#) [HTML, CSS, JS, Parsel, Axios, REST API]

(in process) [CarpTravel GitHub](#) [NEXT.JS, TailwindCSS, swiper, react-form]

(in process) [PixaHunt GitHub](#) [React.JS, Formik, yup, Axios, REST API]
